

Main stakeholders: two low-income developer/two homeless shelters

Please explain what your organization does and how you're involved in it.

What barriers is your organization facing?

What is working? What have you found to support your goals the most?

What is your favorite part of your work :)

What is currently working in low income housing communities/homeless shelters and what is not?

- What has worked in previous low-income housing communities?

What are the main resources that the residents of these homes are lacking or in need of?

Is there anything that your organization needs to better support low-income/homeless shelters?

Do you know what low-income families/homeless are looking for in a stable living situation? What is the most important item that could impact their situation for the better?

- What things are homeless people looking for in a stable living situation?
 - What is most important (to them) in that list?
 - Are there any tangible items that are needed? (rain coats, sunscreen, cart, services, job opportunities, etc...)

What does Rehabilitation look like?

- Mental health, physical health, jobs? What does this look like after help?

What technologies could improve low-income families' housing crisis?

Do you have community games or activities in place? Would it be wanted?

Where is the low-income housing/homeless shelters being placed? Why?

- Are there complications within the placement of the housing?
- What is around the low-income housing plans? (in terms of resources)

What is your knowledge on tiny houses and low-income housing?

- Explain your background with this community.

What is included in the housing?

- What is inside the homes?

- What is the community like within a low income community?
- What is around the community, outside? Jobs, parks, stores?

How long term is the housing?

- Is there a limit on how long a family can stay?
- What are the requirements for housing? Income, job status, family status?

Screening: Do you have knowledge about the contracts regarding the land and material involved in low income housing? Which company or organization will build these houses?

- Where did the land for building the house come from, or was it rented?
- Does the community need to transfer to another place when the contract expires?
- Where will this material come from? Is it sustainable?
